

## FEEDER MOUNTING

These instructions are for mounting your new feeder kit to any drum or bucket. If you are mounting this feeder to the Strike Force feed hopper, please follow the mounting instructions that are included with your Strike Force tripod, as the instructions and hardware used is different.

### FUNNEL MOUNTING

Locate the center of your drum or bucket, and drill a 2" hole in the center.

Center the funnel on the bottom of the drum over the hole. Mark and drill the funnel mounting holes with a 3/16" drill bit.

Install the funnel on the barrel with the smaller open end of the funnel facing away from the drum. Mount the funnel using the #8 machine screws, nuts and washers provided.

### FEEDER MOUNTING

Center the feeder on the bottom of the barrel. Align the funnel so it is in the center of the spin plate on the feeder. Mark the 4 mounting holes and drill them out with a 5/16" drill bit. Mount the feeder to the barrel using the 1/4" bolts, washers and nuts provided.

Our customer service team is here to help you with any questions you may have operating or setting up your new deer feeder. Our representatives are available Monday through Friday from 9am to 5pm CST.
